

I have been an XM RADIO subscriber practically since day one. I enjoy all the programming available to me. I was excited when XM RADIO began broadcasting "XM INSTANT TRAFFIC AND WEATHER". I travel alot between Las Vegas and Los Angeles, and I have several friends and family in several of the cities that are on XM's Lineup of cities. I enjoy listening to what is going on in these various cities. I don't feel that the government has any right to dictate what I have to listen to or not listen to... especially since I am paying for this (XM) service. I urge you (FCC) to reject NAB'S petition 04-160. I also respectfully ask that you support the quality programming that XM RADIO provides. Thank you.
